If you want to get a basic knowledge in embedded system go and search the anna university syllabus In final year(ECE) anna university have one subject named as embedded systems which gives you the basic knowlege in embedded systems

University - Laboratory Exercises

To read a value from memory, the CPU puts the address of the value it wants into the MAR. The CPU then asserts the Read control line to memory and places the address on the address bus. Memory places the contents of the memory location passed on the data bus. This data is then transferred to the MBR.
