Sustainable development is the organizing principle for meeting human development goals while simultaneously sustaining the ability of natural systems to provide the natural resources and ecosystem services based upon which the economy and society depend. The desired result is a state of society where living conditions and resources are used to ...

Governing for Sustainable Urban Development | Taylor ...

Through a network model of governing as learning, Chapter 5 discusses how policy makers can reframe challenges, foster knowledge-focused networks and promote sustainable urban development. Another framework helps to link governing and learning, and Rydin emphasizes that sustainable development requires governments to learn and shift from established practices. The remaining chapters consider the role of different policy tools in urban sustainability.
