Start by removing the screws holding the top of the case on (you'll need your Torx screwdrivers here). You may have to investigate a bit for this, in my case there are six screws visible, and one final screw hidden underneath a warranty sticker. This is a fairly common trick, so make sure you check all over if things are stuck, and especially underneath any warranty stickers.

Check again. I'm serious. Check. We can wait. Now begin by removing all of the screws you can see on the outer casing. You may find that the top part of the casing can be removed first with the screws around the edges giving you enough access to harvest the parts without totally taking it apart, though some models harder to break into than others.

iPad cases come in several styles. Three of the most common are the folio, shell, and sleeve. Folio. A folio case protects the iPad the way a book cover protects the pages of a book. There are usually some straps to hold the iPad in place against the back side of the case while the front flap is loose and can be closed over the iPad or opened up and tucked behind it.

The iPad is easy to use, in part because many of the gestures used to navigate it are intuitive. It's easy to get started on the iPad, tap app icons to launch them and swipe to scroll through pages and menus. But the iPad has other lesser-known gestures that include a hidden control panel, a virtual trackpad, and the ability to display multiple apps on the screen.
