Control panels on more sophisticated TIG welding machines look complex, but the ability to adjust the machine to suit the weld is one reason I prefer TIG welding for motorcycle projects. With minor (and relatively cheap) changes to the tungsten electrode and the filler material, TIG welding can be used to weld steel, stainless steel and aluminum—the most common metals you will use on custom ...

Motorcycle Handling and Chassis Design by Tony Foale Tony is (in my opinion) a legend in the field of chassis design. He seems to have been working on making bikes handle since before most of us were born. There are lots of free articles on his website and these prompted me to buy his book many years ago. However, be warned: This book is heavy on engineering math.
