Whether you are looking for a simple weekend project or willing to play a cover of an '80s hard rock anthem, the Mockman will suit your needs. During the '80s, countless artists recorded directly to console using a Rockman amp. The Mockman sounds uncannily reminiscent of this sound as it is based on the Scholz Rockman's distortion section.

*Rockman Distortion Generator- how do you make this work ...*

The Rockman is a headphone guitar amplifier. The original Rockman was developed and built by Scholz Research & Development, Inc., a company founded by Tom Scholz, who is also the founder and a key member of the rock band Boston. Scholz Research & Development was sold to Dunlop Manufacturing, Inc. in 1995. Dunlop continues to manufacture the Rockman Ace, and Tom Scholz's signature still appears ...

The Rockman Rockman Chorus/Delay was one of the first rockmodules introduced. Although there are many fans of this unit I think it has some limitations. You can only select the chorus or the delay, not both together. Also the maximum delay time is only 200ms. I personally like to use at least 250ms for an echo setting. The delay is not stereo.
