Introduction Edit. Business Analysts, like IT project managers should have a couple of knowledge domains under their belt. Project Managers should know project management, plus a bit of management, plus a bit about the industry they are working on (and for anyone involved in IT) plus a bit about software development.

What Does a Business Analyst Do? First and foremost, what an Analyst does depends a lot upon the industry there in, the type of team they're on, and the company they work for. The team, company, industry, and market all determine the type of work they do, the experience they get, and the knowledge they'll gain.

~~User Story | Business Analysts Handbook | Fandom~~
